

Platform for Analysis of Activity and Expression of Proteins and Antibodies

TECHNIQUES

- Proliferation and Inhibition Assays.
- Radioactivity Assays.
- Colorimetry
- ELISA.
- Enzyme Assays
- Preparation of protein extracts.
- SDS-PAGE Electrophoresis.
- Immunoblotting.
- Immunoprecipitations.
- Immunofluorescence.
- Immunohistochemistry.
- Other technologies, including all type of chromatography.

- IGEN can customize the most appropriate test for required needs.
- IGEN's platform saves time and money.
- Comply with required quality standards.
